Rich the map is too large to email- I get an error that it is too large.. It is on L:Share /HSCD in the map file for Dimock- it is the middle file if you can open it remotely.  
There are two wells. Baker 1V is a vertical well it was drilled in August 2008 and fracked in 11/08. It has been plugged as a result of the problems at Fiorentino.

Baker 3 H -NW is a horizontal well drilled in 12/09 it has not been fracked due to stoppage from the Order

Do you have a e-mailable version of the map you have with the gas wells plotted you can send me?

If not would you mind telling me which gas well is located just to the south of Fiorentino and east of Sautner.  
thanks  
Rich
